INS 3143 Cyber Attack and Mitigation (G1)(2534S)

TEST 2

Topic 1: Port Scanning

1. **B** – Nmap
2. **B** – SYN Scan
3. **B** – Null Scan
4. **C** – HTTPS
5. **C** – TCP Connect Scan
6. **A** – No service is running
7. **A** – UDP Scan
8. **B** – High-speed port scanning
9. **B** – Connectionless services
10. **C** – Firewall prevents checking

Topic 2: Enumeration

1. **D** – Scanning
2. **B** – LDAP
3. **B** – Enum4linux
4. **A** – 161
5. **D** – SMTP Enumeration
6. **C** – SNMPv3
7. **A** – 137–139
8. **A** – rpcclient
9. **C** – Hostnames and IP mappings
10. **B** – SNMP

Topic 3: Desktop & Server OS Vulnerabilities

1. **C** – Buffer overflow
2. **B** – SMB
3. **B** – Linux
4. **B** – User gains higher privileges

5. **A** – Metasploit
6. **B** – Missing security updates
7. **B** – Print Spooler service
8. **C** – Applying patches
9. **B** – Login without valid credentials
10. **B** – Windows-based systems

Topic 4: Hacking Web Servers

1. **A** – Nikto
2. **B** – Local File Inclusion
3. **A** – Apache
4. **B** – Databases
5. **B** – ../../etc/passwd
6. **B** – User browsers
7. **B** – Include remote malicious files
8. **A** – Burp Suite
9. **C** – Directory indexes
10. **B** – Encrypted communication

Topic 5: Network Protection Systems

1. **B** – Network
2. **B** – Intrusion Detection System
3. **B** – Block attacks
4. **A** – Log correlation
5. **B** – pfSense
6. **B** – Endpoint Detection & Response
7. **B** – NAC
8. **B** – Deep packet inspection
9. **B** – Secure encrypted tunnels
10. **B** – Correlating events
